10th November 2026

The Headteacher
Kitende C/U Primary School
Kitende, Entebbe Road
Wakiso District

Dear Sir/Madam,

RE: REQUEST FOR AN APPOINTMENT TO INTRODUCE THE MUZADI SCHOOL MANAGEMENT SYSTEM

Warm greetings from Muzadi Technologies Company Limited. We are a Ugandan technology company registered in Kampala, dedicated to helping schools work smarter through simple, reliable digital tools.

We have developed the **Muzadi School Management System**, a complete online platform built for Ugandan primary schools. It brings admissions, academics, fees, attendance, report cards and communication with parents together in one place. I am writing to kindly request an opportunity to meet you and introduce the system to you and your administration.

Some of the key benefits the system will bring to your school include:

1. **Easy fees management:** The system integrates with SchoolPay, so fees paid by parents through mobile money are recorded automatically. The bursar can see balances, receipts and defaulters instantly, reducing errors and long queues.
2. **Fast and accurate report cards:** Teachers enter marks, and report cards are generated automatically. Report cards show each pupil's marks, total, aggregates and division in line with PLE grading, with class positions and teachers' comments. Report cards can also be withheld for pupils with outstanding fees.
3. **Better PLE preparation:** Results of P.7 candidates from beginning-of-term, mid-term, end-of-term and mock examinations are kept in one place, so teachers can follow each candidate's progress and give extra support early to those who need it.
4. **Mark entry on phones, even offline:** Teachers can enter marks on their mobile phones. Where internet is unreliable, marks are saved on the phone and sent to the system once the connection returns.
5. **Better communication with parents:** The school can send SMS (and soon WhatsApp) messages to parents about fees, results, meetings and important announcements.
6. **Pupil records in one place:** Admissions, class lists, attendance, boarding and promotion records are kept safely and can be found in seconds, saving time and paper.
7. **Clear reports for school leadership:** Dashboards give you a quick view of enrolment, fees collection, attendance and academic performance from P.1 to P.7 to support decision-making.

8. **Secure and controlled access:** Each staff member logs in with their own account and only sees what their role allows. Your school's data is kept separate and protected, in line with Uganda's data protection law.
9. **Works on any device:** The system runs on computers, tablets and smartphones, and can be installed on a phone like an app. No expensive equipment is required.
10. **Local support and training:** As a Ugandan company, we provide hands-on training for your staff and continuous support, and we keep improving the system based on schools' feedback.

In view of the above, I kindly request an appointment of about 30 to 45 minutes at a date and time convenient to you. During the meeting, we would like to:

- Give a live demonstration of the system and how it works day to day
- Understand your school's current processes and specific needs
- Explain how the system can be set up for your school, including staff training and data entry support
- Discuss the subscription options and answer any questions you may have

We are happy to meet you at the school, and we can adjust to your schedule. Kindly let us know a suitable date and time by calling or sending a WhatsApp message to +256 784 103 296, or by email at info@muzaditechnologies.com.

Thank you for your time and consideration. We look forward to the opportunity to meet you and to support Kitende C/U Primary School in its work.

Yours faithfully,

Makki Muzisa
Director
Muzadi Technologies Company Limited
